Academic Profile

Computer Science and Engineering graduate (CGPA 3.88/4.00, Magna Cum Laude) preparing for master's study, with a co-authored IEEE conference publication, academic research in EEG signal classification, university teaching experience, and professional experience in healthcare data automation.

Education

East West University, BSc in Computer Science and Engineering – Dhaka, Bangladesh Jan 2020 – June 2024
CGPA: 3.88/4.00 | Magna Cum Laude | 100% merit scholarship

Publication

- Md. Adnan Morshed, **Abdullah Al Tamim**, Md. Ahnaf Morshed, Fatema Akter, Sanjeda Sara Jennifer, Ahmed Wasif Reza, and Mohammad Shamsul Arefin. "Unveiling Microorganism Diversity through Neural Network-driven Classification." *2024 IEEE International Conference on Computing, Applications and Systems (COMPAS)*, 2024, pp. 1-5. doi:10.1109/COMPAS60761.2024.10796528

Research Experience

Neural Network-driven Microorganism Classification

Published research | Co-author | 2024

- Contributed preprocessing and model-training code, and wrote sections of the paper.
- The study investigated image classification on EMDS-6 using data augmentation, normalization, and an Inception v3 model.

Decoding Object Shapes from EEG Signals of the Brain

Unpublished undergraduate thesis | Team lead, four-person team | Supervisor: Dr. Ahmed Wasif Reza, East West University

- Investigated classification of object shapes from EEG signals recorded during touch-based identification without visual input; assisted with data collection.
- Converted EEG signals into image representations using Continuous Wavelet Transform (CWT) and Fast Fourier Transform (FFT), and built the deep learning models.
- Explored a stacked ensemble of three YOLOv8 models with a Random Forest classifier; further validation was limited by data quality and EEG acquisition equipment.

Teaching Experience

Undergraduate & Graduate Teaching Assistant, East West University – Dhaka, Bangladesh Apr 2022 – Jan 2025

- Tutored students individually and in groups, supported project work, and assessed assignments and lab tests across six computing courses.
- Courses supported: Object Oriented Programming, Algorithms, Database Systems, Artificial Intelligence, Software Engineering, and Information System Analysis and Design.

Professional Experience

Senior Data Automation Analyst, Commure BD (formerly Augmedix BD) – Dhaka, Bangladesh — Feb 2025 – present

Joined February 2025; promoted to Senior in March 2026

- Received the Beast Award (Level 1: NESSIE), recognising an import-error resolver copilot that enabled resolution of approximately 120,000 claims and billable-unsubmitted workflow automation.
- Designed healthcare data-quality and automation tools using Python, JavaScript, SQL, Retool, Selenium, and Playwright across extraction, import, and claim-submission workflows.
- Reduced an import-error backlog from approximately 18,000 to 4,000 in three weeks; co-developed automated eClinicalWorks encounter-volume extraction and independently extended it to three additional EHR platforms.
- Re-architected operational applications with parallel query processing and caching; migrated heavy queries to StarRocks and updated 96 instances of deprecated logic in H1 2026.

Selected Technical Projects

Online Railway Ticket Reservation System

Team lead and full-stack developer | Django REST, Bootstrap, JavaScript, Oracle DB

- Led development across frontend and backend for seat selection, ticket payment, e-ticket download and email delivery, journey history, and an administrative scheduling panel.

Face Attendance System

Personal project | Python, Firebase

- Developed a face-based attendance application for registered users, with a check to prevent duplicate attendance entries on the same day.

LisTog

Personal project | Django REST, React, Spotify Web API, SQLite

- Developed a shared-listening prototype with virtual rooms, permission-based playback controls, and voting to skip tracks.

Training and Awards

- 100% merit scholarship for academic performance, East West University.
- Second place, Semester Break Contest, East West University Computer Programming Club.
- B-JET Basic Course, North South University / University of Miyazaki, 3 June–18 October 2024: completed; term exam 99/100, final exam 95/100 (Excellent).
- B-JET Basic Plus Course, University of Miyazaki, 21 October–6 December 2024: completed; final exam 96.8/100 (Excellent).
- Japanese language, workplace culture, etiquette and IT training alongside EWU teaching assistance.
- B-JET Giver Award: selected by batchmates through student voting for sustained support to peers throughout training; also received High Performance Awards in Terms 1 and 2.
- Microsoft Azure Administration workshop, East West University Robotics Club, 13 May 2023: completed.
- SQL (Intermediate), HackerRank
- IELTS Academic: overall 7.5 (CEFR C1); Listening 7.5, Reading 8.5, Writing 6.0, Speaking 7.0. Tested 19 October 2026.

Technical Skills

Programming: Python, JavaScript, SQL, C++, Java

Research & analysis: Pandas, NumPy, Matplotlib, Seaborn, TensorFlow; CWT, FFT, deep learning, ensemble modeling

Systems & databases: Django, React, REST APIs, PostgreSQL, Oracle DB, MySQL, Firebase

Automation & collaboration: Retool, Selenium, Playwright, Git/GitHub
