Profile

Healthcare operations and automation analyst experienced in revenue cycle management (RCM), site ownership, submission-error resolution, and cross-team coordination. Combines operational judgment with SQL, dashboards, and workflow automation to improve claims reliability and reduce manual work.

Core Skills

Operations: RCM, site health, SLA tracking, issue triage, process improvement, stakeholder coordination

Analytics & tools: SQL, PostgreSQL, Retool, Excel, dashboards, Linear, workflow QA

Experience

Senior Data Automation Analyst, Commure BD (formerly Augmedix BD) – Dhaka, Bangladesh — Feb 2025 – present

Joined February 2025; promoted to Senior in March 2026

- Received the Beast Award (Level 1: NESSIE), recognising an import-error resolver copilot that enabled resolution of approximately 120,000 claims and billable-unsubmitted workflow automation.
- Expanded ownership from five to approximately 23 sites within two weeks in the Submissions Core team, including four high-dollar sites; maintained zero SLA breaches across support and spot-check tickets during the assignment.
- Diagnosed site-specific submission failures using knowledge of payer constraints and the extraction, import, submission, and reconciliation stages of the claims pipeline.
- Delivered 20+ workflows and three dashboards in 2025, supporting more than $10M in tracked claims value and saving an estimated 70 team hours weekly across billable-unsubmitted claims, import errors, and submission errors.
- Reduced the import-error backlog from approximately 18,000 to 4,000 within three weeks through structured ownership, safe workflow triggers, and optimized extractions.
- Owned the Submission Error Tracker used by US stakeholders for audits; restored critical workflows with safeguards and supported QA and rollout of six error-specific workflows in 2025.
- Rebuilt site-responsibility routing to provide claim-specific action guidance for three major pre-submission categories in H1 2026.
- Led team syncs, maintained Linear ticket updates, and coordinated operational continuity during remote-work periods; took over existing applications and workflows during a teammate transition.

Undergraduate & Graduate Teaching Assistant, East West University – Dhaka, Bangladesh — Apr 2022 – Jan 2025

- Tutored students and evaluated assignments and lab tests across six computing courses, including algorithms, databases, AI, and software engineering.

Education

East West University, BSc in Computer Science and Engineering – Dhaka, Bangladesh — Jan 2020 – June 2024
CGPA: 3.88/4.00 | Magna Cum Laude | 100% merit scholarship

Certification

- IELTS Academic: overall 7.5 (CEFR C1), 19 October 2026.
- SQL (Intermediate), HackerRank
